

## Bry-Air's Pharmaceutical Partners

- *Abbott Labs*
- *AstraZeneca*
- *Bayer Laboratories*
- *Becton-Dickinson*
- *Bristol Myers/Squibb*
- *Cardinal Health*
- *Dow Chemical*
- *Eli Lilly*
- *GlaxoSmithKline*
- *Johnson & Johnson*
- *JRH Bioscience*
- *Merck*
- *Roche Diagnostics*
- *Schering Plough Corporation*
- *Smith Kline Beecham*
- *Searle & Co*
- *TEVA*
- *Warner Lambert*

# APPLICATIONS IN THE PHARMACEUTICAL INDUSTRY

Pharmaceutical manufacturing requires precise control over the indoor environment. Excess moisture can cause fine powders to clump or alter the chemical composition which can cause entire batches of drugs to be rejected. By using Bry-Air desiccant dehumidifiers, pharmaceutical manufacturers gain the precise control they need over the indoor environment.

Traditional air conditioning is effective, but to get RH down below 30 percent and achieve precise control, a Bry-Air desiccant dehumidifier is necessary. Desiccant systems offer many advantages for your facility such as maintaining consistency of your product and lowering energy cost compared to a standard mechanical coil HVAC system.

For such applications consisting of condensation prevention, corrosion prevention, product drying, and mold & fungus prevention, Bry-Air has the solution for these and any other applications that a facility needs.

Bry-Air is distinguished by its unique ability to custom design and manufacture a system to optimally solve a specific user's problem. By working with you Bry-Air can design the unit that is right for your application.

### Here are just a few of the things Bry-Air can do for you in the Pharmaceutical Industry:

- Gain Precise Humidity & Temperature Control over the Indoor Environment.
- Maintain Greater Consistency & Quality of Products.
- Improve Drying Times of Powders, Capsules & other Products.
- Preventive & Corrective Maintenance of Process Critical Equipment.
- Handling of Cryogenic Parts that are Moisture Sensitive.
- Improve HVAC Sanitation.
- Control Airborne Particles, such as Asthma Triggering Irritants & Biological Contaminates.
- Save on the High Energy Costs of Traditional Air Conditioning Systems.
